

NEW

RIVIERA® HD

the ultimate heavy-duty cantilever umbrella

SILVER GREY NYLON
COMPONENTS

UPGRADED 23MM FIBREGLASS CANOPY ARMS

BUILT TOUGH FOR WINDY LOCATIONS

The Riviera HD is our new premium Riviera model developed for commercial and windy environments. The main difference between a standard Riviera and a Riviera HD model is that we have upgraded the canopy arms to super strong 23mm diameter fibreglass. This upgrade means that the arms can bend considerably without being damaged, making the Riviera HD ideal for windy locations and tough commercial environments.

Above: Riviera 4m Octagonal with Ecru fabric. Installed in Mission Bay, Auckland, New Zealand.

RIVIERA® HD ADVANTAGES

- Super strong upgraded 23mm fibreglass canopy arms
- Newly designed colour scheme with Silver Grey nylon components
- Marine-grade 20 micron anodised aluminium mast & components
- Superior strength and ability to withstand wind
- All the other benefits of our popular Riviera cantilever umbrella
